

Nonsense Rules lyrics – written and performed by Mortal Fools Youth Theatre
Online Group

VERSE 1:

First rules are made...

By Ur Nammu,

He's ancient,

He's a ruler,

He made Hammurabi.

Girl code an unwritten rule,

That may uplift a girl,

And makes you cool,

The compliments make you wanna twirl,

But regardless it's unwritten.

First written rules!

Make you feel as cute as a kitten

Rules are bad

Don't put them down in the dumps

Rules are good

Instead make them giggle and jump

School rules so: negative / no murder so positive

Nonsense rules everywhere!

Do something odd and you'll get a stare

We want to break em, but it's impossible

Keep staying in the line.

Keep crossing the line.

Keep staying in the line!
Keep crossing the line!
Make sure every line of your poem...
is nonsense.

BRIDGE 1:

In the school where the rules are quite ridiculous,
You'll find the students have zero blissfulness.
No walking backwards down the hall,
In case you bump into the corridor wall.

CHORUS 1:

Nonsense rules are everywhere!
If I want a Caprisun for once in my life, why can't I have it?
Nonsense rules are everywhere!
One glue stick per table of eight!? You're not alone if this makes no sense
Nonsense rules are everywhere!
It's okay not to understand why these rules restrict you
Help the world and give some hope!!!

VERSE 2:

Being a minute late is nothing when so many children are lucky to have a day
of education
Yeh don't take the nonsense that they tell you
What do they mean, why are rules nonsense?
I am a punk star I will help you guide you through, let's make some rules to
prove them wrong
How can't they see that this isn't right?

Let's prove them wrong because they think we know nothing
Why waste your breath making our lives harder when you could be using it to
make other's easier?

BRIDGE 2:

In math class, calculators are banned,
English no thesauruses, dictionaries and,
If you wish to go to the loo,
Wait 1 minute, possibly 2.

CHORUS 2:

Nonsense rules are everywhere!
Why can't you go to the toilet during lessons, what if you really need to go!
Nonsense rules are everywhere!
If 1 teacher teaches one subject why is 1 kid supposed to learn all of them!!
Nonsense rules are everywhere!
It's okay not to understand why these rules restrict you
Nonsense rules are everywhere!
You're not alone if this makes no sense
Help the world and give some hope!!!

VERSE 3:

So you have a busy schedule
Do less
That is the solution
Nonsense rules are everywhere like
1 glue stick per table of 8
And we have to do things in time limits as well

it is just stressful
And wrong

So if anyone out there is still reinforcing
Still out there
Help their cause and make them glad
Uplift them and don't make them sad
So stay happy and keep believing

BRIDGE 3:

Lunchtime comes with a peculiar change,
You must eat soup with a fork, it's very strange.
And when the bell for lessons tolls,
Hop on one foot to reach your goals.

DROP:

Imagine a boundary, a boundary in your brain. By staying on one side, you're safe.

Say I managed to get over to the other side. I might not be safe, but my eyes would be fully open. I could help you realise that it doesn't matter when you see the bigger picture.

BRIDGE 4:

So here's to the school with rules so laughable.
They make each day an adventure, it's remarkable.
Where learning's a laugh and life's a school,

And nonsense reigns as the number one rule!

CHORUS 3:

Nonsense rules are everywhere!

If nonsense rules are a thing then maybe pigs can fly

Nonsense rules are everywhere!

No doodling in your books! You can't spend your pocket money on that!

Nonsense rules are everywhere!

It's okay not to understand why these rules restrict you

You're not alone if this makes no sense

Help the world and give some hope!!!
