

Paper Sculptures

This exercise is excellent for using up old wrapping paper, newspapers, leaflets and magazines. Using a sheet, flatten it out on the table.

Experiment in different types of paper. Depending on the type or thickness some can leave a pattern when you crumple them like this.

Slowly crumple the paper, shaping it as you go and see what it moulds into. Tear the edges and try to make a shape.

For an extra element to this exercise you can colour in or paint your sculptures, unfold them and see what pattern emerges.
